RE: GENERAL HOMES OF COLUMBIA, LLC AND  
TERRA TECHNOLOGIES, LLC  
DIRECTOR'S ORDER No. 07-040D MAURY COUNTY, TENNESSEE

VIA FAX: (615) 532-0686

Dear Mr. Davis,

As representative for Terra Technologies, LLC, I would like to petition for a hearing on the above mentioned Order and Assessment before the Water Quality Control Board.

Our company adheres to the guidelines for water quality control in all our daily operations. Precautions were taken the day of the activity mentioned in this order. All operations at this site have ceased, and we so, prior to the issuing of this order. We have information that we believe will show that we took every precaution warranted at the time and immediately following the site investigation.

I spoke with Vojin Janjic prior to the due date of the first portion of the civil penalty that was assessed. I told him that I wanted to request a hearing and asked if I should pay the penalty at that time so that it was paid on time. He said that only damages must be paid, of which none were assessed, and that the penalty did not need to be paid prior to a review.

It is my hope that the penalty will be reconsidered in this case. Please let me know when a review is set. Thank you for your consideration.

Sincerely,

Synthia Foree  
Chief Manager  
Terra Technologies, LLC
